Eagle Point Hires Construction Tech Manager, Will Launch Construction Solutions and Content in 2019

Tech Leader Will Expand Their Digital Toolbox to Include Assemble, PlanGrid and Building Connected, Helping Construction Companies Increase Tech Adoption, Efficiency and ROI

DUBUQUE, IA — June 3, 2019 — Today, Eagle Point Software announced the addition of Bianca Holtier Coury as Construction Technology Manager. Bianca brings Construction Technology and Management experience to the Eagle Point team. Her experience working in various roles for some of the country's largest companies in the industry include Plaza Construction (New York, NY), Sweeney+Conroy (New York, NY), Michilli Construction+Consulting (New York, NY), Ozanne Construction Company (Cleveland, OH), The Austin Company (Cleveland, OH), Séamus Henchy and Associates (New York, NY) and more.

As Construction Technology Manager for Eagle Point Software, Bianca will be on the frontline of workflow innovation, best practices and communication. Bianca will be building content for on-demand training that will help organizations adopt new technologies, workflows and SOPs faster for a smart and connected jobsite.

"Bianca's broad-based experience in construction technology means we'll have a construction industry expert delivering real-world solutions. This will bring value to our customers' organizations," John Biver, President & CEO said. "Since our company began, we have provided solutions to Architectural and Engineering firms. Construction companies today are looking for every efficiency and competitive advantage they can get in order to improve project deliverables and generate high quality results on time and within budget. It's the right time for us to expand our solutions offering to provide construction-specific content. After all, the primary tool that the construction industry needs to build these results is technology."

Later this year, Eagle Point Software is expected to release content for Assemble, BuildingConnected and PlanGrid. Autodesk acquired these construction software companies about one year ago.

Eagle Point has been a long-time member of the Autodesk Developer Network (ADN) and, in fact, was one of Autodesk's first members, joining the program in 1986. This long-time partnership has given Eagle Point a close relationship with the Autodesk development staff that correlates to added value to Eagle Point's customers.

Holtier Coury earned her B.A. in Urban Design and Architecture Studies from New York University. She is Procore Certified and a LEED Green Associate. She resides in Cleveland, Ohio with her husband Matt and their two children.
